

NoMoreTears (NMT)

Tear Control Fluid for Hashers

Description:	NMT is a versatile polymer additive, which provides the appearance of toughness and tear duct stabilization in all types of Hashers. NMT is supplied in 1kg bags, with cotton buds, which provides a convenient means of applying correct concentrations of the product.
Applications:	NMT is a water-soluble polymer, which provides protection against crying from sensitive Hashers by forming a tough impermeable filter cake around the Hasher's eyes. It can be used as a single additive or with LiquidHeart, and other Muka Puki's FluidStar products. NMT is effective in nimrods, gays, whingers, and male Hashers who have vaginas.
Advantages:	<ul style="list-style-type: none">• Soluble in water and can be mixed while crying is occurring• Non-toxic and environmentally acceptable• Effective in small concentrations• Very versatile product compared with most Hashers• Effective on all Hasher types• Can be used as 'one sack' Hasher enhancement• Improves morning after recovery• Reduces bitching like "My pussy hurts"• Packaged in small sacks with cotton buds for convenient measuring and easy application
Appearance:	<ul style="list-style-type: none">• Solid – white, free flowing powder• Liquid – white, slightly goeey gel
Recommended Treatment:	NMT can be mixed and applied while the Hasher is crying simply by adding the NMT to the bottom lip of the Hasher. During the crying process, water will stream down from the eyes and puddle near the lip. With the natural quivering motion of the bottom lip, this will be enough agitation to mix the product, allowing easy application to the tear duct with the cotton buds. <ul style="list-style-type: none">• To reduce bitching and sniffles, add 1kg per Hasher• To stabilize teary eyes and sand in vaginas etc, add 1-2kg per Hasher• To improve the properties of a Hasher, add 2-3kg per Hasher
Packaging:	NMT comes in crates of ten (10) or fifty (50) sacks. Each sack contains one (1) kilogram.
